This Course is aimed at middle grade doctors (FY2/ST1) involved in acute medical receiving. Patients with COPD are commonly admitted to hospital with acute exacerbations, occasionally complicated by the development of acute type 2 respiratory failure. This Course is designed to cover the principles for Non-Invasive Ventilation (NIV) in these patients, and there will be the opportunity to have hands on experience with NIV machines commonly used in the main Glasgow hospitals.

**This course has a limit of 12 places therefore early booking is recommended**
