

Glasgow Medical Forum

“It’s just a bug” Infection in Acute Medicine

Friday 3rd December 2010

This one-day symposium is aimed at doctors who may assess and treat patients with infection who present to Acute Medicine.

Topics covered will include the acute presentation and management of specific infections such as **CNS infection, respiratory infection, endocarditis and STDs**, along with discussion about **hospital-acquired infection** and the management of **chronic sepsis**. There will be case discussions, and presentations on **soft tissue infections in IV drug users**, and **fever in a returning traveller**.
