

IMRCS NOTICE FOR OVERSEAS CANDIDATES

The College wishes to inform candidates based in overseas countries that it intends to continue to offer the current IMRCS examinations in overseas locations as long as there is sufficient demand. The Intercollegiate Committee for Basic Surgical Examinations (ICBSE) will continue to set the IMRCS for an indefinite period.

The IMRCS (June 2006 Regulations) will continue to be set at the same standard. The new MRCS examination (2008) is designed specifically for UK-based trainees in specialty posts who are also undergoing workplace-based assessments. The examination format complements these assessments.
