

**Travelling Fellowship Report
Moorfields Eye Hospital, London
July 2007 – 31 August 2007**

Dr A A Y El-Karmouty

I was awarded a travelling fellowship grant from the Royal College of Physicians and Surgeons of Glasgow to visit Moorfields Eye Hospital, London for a period of 2 months from July 2007 to learn techniques in the surgical management of glaucoma.

I have been to the clinics and operating theatres, attended the weekly teaching lectures (grand rounds) and everyone here is so friendly. I have learned a lot, specifically the tube implant technique and congenital glaucoma surgical intervention, this was the right place to come to and I joined a research work held by the glaucoma unit. Hopefully my name will be on the paper when it is completed. I highly recommend this place for any further ophthalmological training candidates and glaucoma in particular.
