

Travelling Fellowship Report

Dr Eman Nasr El Dine Abdel Hamid Sultan

I carried out an observation in Moorfields Eye Hospital for 5 weeks (according to my financial support from the college) starting from 9/6/2007 till 15/7/2007. I really appreciate the support I received from the Royal College of Physicians and Surgeons of Glasgow, it was very useful.

I was attached to the adnexal services, meeting 5 consultants that deal with different techniques in their management. I saw a variety of lid lesions, orbital lesions, lacrimal lesions, pediatric ocular lesions and syndromes and how they deal in their management and investigations especially the genetic counseling that we miss in our country. Also the different detailed consents and how they deal with the patients. Also how they approach the surgeries. I observed the following surgeries with nearly no complications, the hospital were very equipped

<i>Procedure</i>	<i>Observed</i>
Blepharoplasty	05
Ptosis	10
Orbitotomies	15
Dacrocystorhinostomies	10
Lid repair and reconstructions	15
socket molding	05
tumor excisions and biopsies	05
eviscerations and ball implants	02
dermal fat graft	01
Dermolipoma excision	02

Also I attended the Botox clinic, the emergency services, and Prosthetic services and how they support patients psychologically. Again they were very supportive and very helpful and allowed me access to the library with different e journals.

I attended the hospital from 8.30 am until 5.00 pm unless there were private cases so I continued even till 9.00 pm and I was really happy for these, then I went to the library from 5.30 pm until 8.30 pm doing my research and returning home at 9.30 pm, it was summer time that encouraged me.

Again I miss Scotland and to visit the Royal College. Finally thank you very much for everything.
