Modern Clinical Collection

Davidson's Clinical Cases

M.W.J Strachan, Churchill Livingstone, 2008

Awarded a 1st Prize in the 2009 BMA Medical Books Competition, this book reflects the real world in which doctors practise medicine. This selection of clinical problems guides the reader through the correct path in the maze between the presenting complaint and the final diagnosis. The text emphasises the value of interpreting available clinical and investigative information in a logical way before considering a definitive diagnosis.

WB 293 STR

Davidson's Foundations of Clinical Practice

H.R. Scott, Churchill Livingstone, 2009

Designed as a companion to the initial years of hospital training for junior doctors, including, but not limited to, the core elements of the curriculum for Foundation Training in the UK. Patients have co-morbidity and mixed patterns of clinical presentation - this book provides key guidance on presentation and care of patients within a wide range of disciplines.

WB 102 SCO

Macleod's Clinical Examination

G. Douglas, Churchill Livingstone, 2009

Macleod's Clinical Examination describes the practical skills that every clinician must acquire and develop in order to evolve diagnostic procedures and management strategies. The book is divided into 3 sections: (i) general overview on history taking and general examination, (ii) systematic examination section documents clearly the relevant history, examination and special investigations as well as giving advice on their significance, (iii) specialised areas and emphasis on integrated and structured approach to patients.

WB 200 MAC

Oxford Textbook of Medicine (5th Edition)

D.A. Warrell, OUP, 2010

The newest edition of the Oxford Textbook of Medicine includes a comprehensive, well balanced and up-to-date section on cardiovascular medicine. Clinical aspects are presented together with the science that underlies them. The OTM conveys to the reader as much crucial information as books many times its size

WB 100 WAR

Principles & Practice of Surgery

O.J. Garden, Churchill Livingstone, 2009

Companion textbook to Davidson's Principles and Practice of Medicine. Comprehensive textbook for the surgical student and trainee, guiding the reader through key core surgical topics which are encountered throughout an integrated medical curriculum as well as in subsequent clinical practice.
